Fig. 1

Coil power cord into the **TcFLEX-SOLO**. Leave ends of the cord out, making sure it can reach a power outlet and the speaker's power plug.

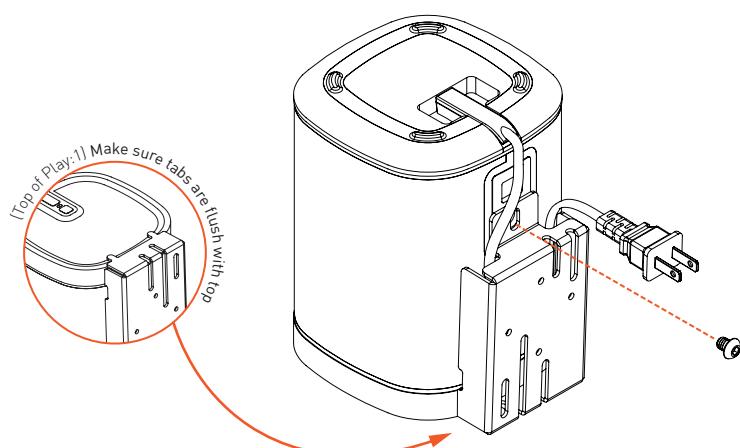

Fig. 2

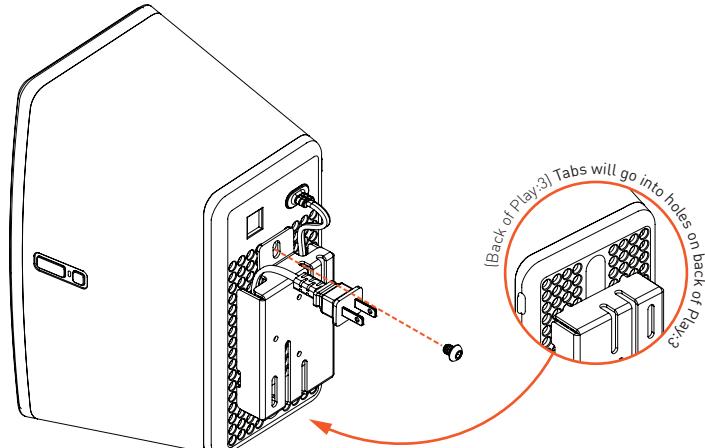

[Optional] Secure wires with a zip tie or wrap (not included)

Fig. 3

Play: 1

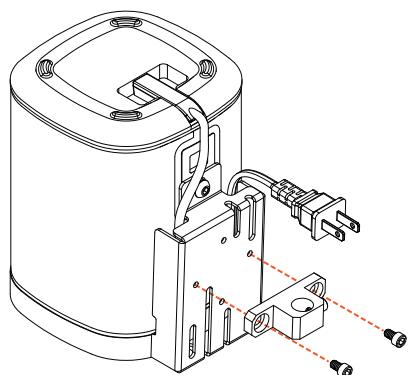

Play: 3

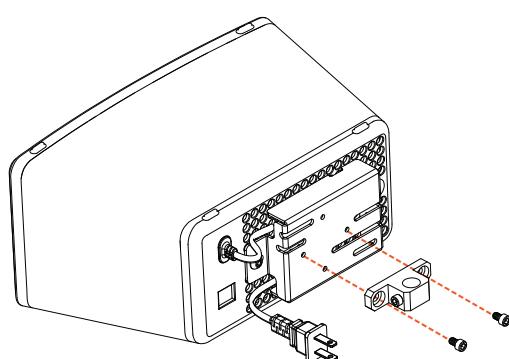

Position the **TcFLEX-SOLO** as shown. Secure the **TcFLEX-SOLO** to the speaker using the **SHORT BUTTON HEAD SCREW**, then plug the power cord into the speaker.

Fig. 4

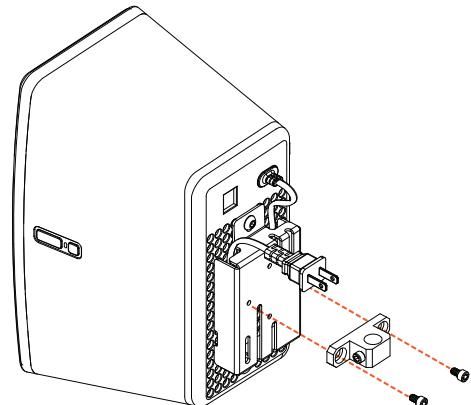

Play: 1

Play: 3 (Horizontal)

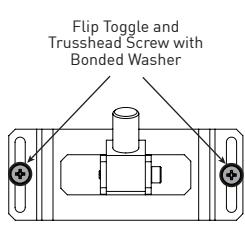

Play: 3 (Vertical)

Fasten the **SWIVEL MOUNT** bracket to the **TcFLEX-SOLO** using two **SOCKET HEAD SCREWS**. The **SWIVEL MOUNT** can be oriented to mount the speaker vertically or horizontally. Make sure the speaker is upside-down so the buttons are still accessible when mounted.

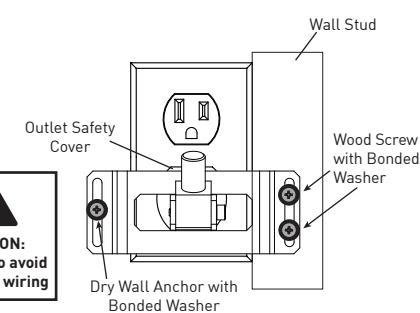

Fig. 5

Open Wall

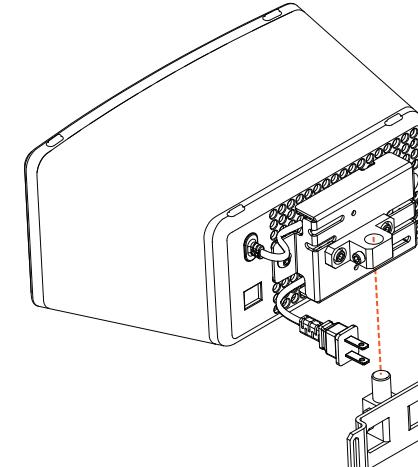

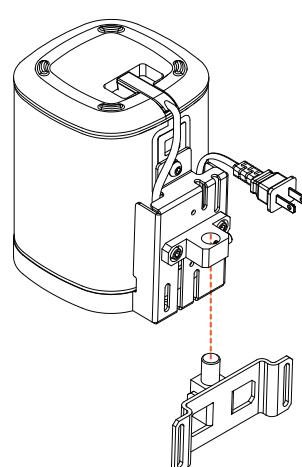

Bridge Mount

**NOTE:** Do not use anchor deeper than 1" to avoid electrical shock

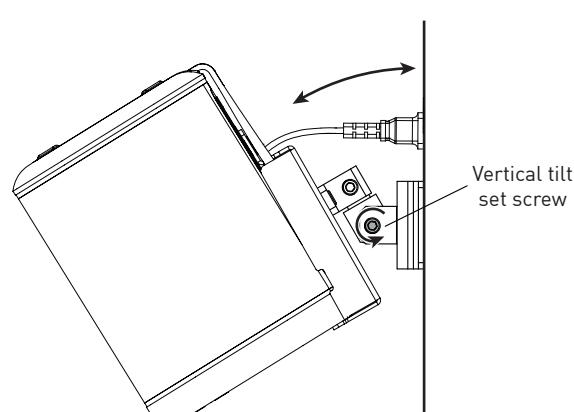

Use wall mount hardware as shown above for mounting **BRACKET PLATE** on either open wall or over an outlet. It is recommended to cover the unused outlet with an **OUTLET SAFETY COVER**.

Fig. 6

Mount to wall by placing **SWIVEL MOUNT** on **BRACKET PLATE**. Plug power cord into an outlet.

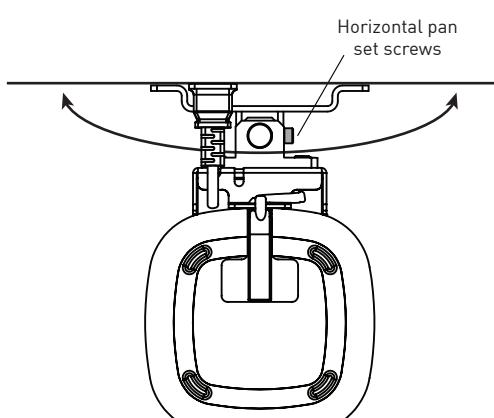

Fig. 7

SIDE VIEW

To adjust vertical tilt, loosen set screw on **BRACKET PLATE**

Fig. 8

TOP VIEW

To adjust horizontal tilt, loosen set screw on **SWIVEL MOUNT**. Make sure all screws are tight once speaker is in desired position.
